SUMMARY

I'm a full Stack Engineer with 1.5+ years building scalable web App and SaaS platforms with Node.js and React.js. I ship clean, optimized code fast, leveraging AI-assisted development workflows without sacrificing code quality and architecture.

SKILLS

Languages JavaScript, TypeScript, Python

Frontend React.js, Tailwind CSS, Shadcn, Redux, TanStackQuery, Context API, Next.js

Backend Node.js, Express.js, FastAPI, RESTful API, Socket.io, Redis, Joi, SSE, OAuth 2.0, RBAC, JWT Authentication

Databases MongoDB, PostgreSQL

Cloud & DevOps AWS (EC2, S3), Docker, CI/CD pipeline, Vercel, Neon, Railway, Render, Cloudinary, Linux/CLI

Tools & Others Git, API Integration, Stripe, Nginx, Version Control, NextAuth, Hugging Face

Testing API Testing (Postman), Performance & Load Testing (k6), Backend Validation & Debugging

WORK EXPERIENCE

Realz Solutions | *Web developer*

Full time Job | Sept 2024 - Apr 2025

- Developed a CallerID web app using MERN stack and Twilio, automating calls to 20+ numbers with interactive voice scripts, boosting client productivity by 20%.
- Managed Git workflows including branches, pull requests, and merging conflicts while collaborating efficiently in a team-based environment.
- Enhanced full-stack expertise by collaborating in real time with teammates and the CTO, while following best coding practices to deliver scalable and maintainable solutions.

DevCon14 | *Full Stack Developer*

Part time Job | May 2025 - Feb 2026

- Collaborated in a cross-functional team of 4 and built a Real Estate Dashboard using FastAPI (backend) and React (frontend), delivered within given time, ensuring data will be available for Chat Bot training timely.
- Optimized performance and UX by implementing **debouncing**, **pagination**, and TanStack Query for efficient data fetching, while managing 50+ complex form fields, resulting in faster load times and smoother interactions.

PROJECTS

AI powered docs-Analyst | [GitHub Repo](#) | [live](#)

Solo-Built Production App *March 2026*

- Built a production full-stack AI document analysis platform with Google Gemini integration, multi-key rate limit rotation, JWT authentication, HTTP-only cookies, and Google OAuth 2.0 authorization code flow
- Deployed on AWS EC2 using Docker Compose with multi-stage builds, Nginx reverse proxy, SSL/TLS via Let's Encrypt, NeonDB serverless PostgreSQL with PgBouncer connection pooling, and layered security (Helmet.js, rate limiting, CORS)
- Automated CI/CD pipeline with GitHub Actions, TypeScript validation, Docker image builds tagged with commit SHA for rollback, and zero-downtime EC2 deployment on every push to main.

AI Interior Design | [live Demo](#)

Personal Project *July 2025*

- Deployed a custom AI image generation model on Hugging Face Spaces with Gradio, enabling dynamic room styling via text prompts.
- Built secure auth and storage using Clerk, AWS S3, and Prisma ORM + PostgreSQL to handle user data, prompt history, and image metadata.

RenderForge - SaaS Platform

Private Project *Oct 2025*

- Built a cloud rendering SaaS platform supporting Maya, Cinema4D, 3ds Max, and Blender plugins, with a FastAPI main server and a Flask microservice communicating directly with Deadline on client remote machines.
- Integrated Stripe-based payment system with dollar-to-render coin conversion, Google OAuth and custom authentication, and a user dashboard for managing render jobs and credits.
- Deployed a production-ready full-stack system with dual-server architecture, handling real plugin workflows across multiple 3D applications.

EDUCATION

Islamia University Bahawalpur

Bachelor of Science - IT, Information technology

Duration: 07-2021 - 06-2025
